

VOA Broadcasting to Afghanistan

VOA reaches roughly 38 percent of Afghanistan's adult population with its popular Radio and TV Ashna ("Friend"). VOA is one of the leading sources of daily news and information for the country's population of nearly 30 million as well as a large Afghan diaspora around the world. Radio and TV Ashna cover a wide variety of issues including current affairs, US policies, security, health, science, entertainment, sports, youth and women's rights. In addition, VOA reaches about 80 percent of Afghanistan's estimated 3-4 million social media users. Afghanistan's post-Taliban constitution guarantees freedom of press, but insurgent and terrorist groups, the government, powerful warlords and clerics continue to control and influence major news sources. Radio and TV Ashna and the service's digital platforms fill the information gap by providing daily local and international news.
