

VOA Broadcasting to Afghanistan

VOA *Ashna* (“Friend”) reaches roughly 64 percent of Afghanistan’s adult population with its popular TV, radio and digital content. VOA is one of the leading sources of daily news and information for the country’s population of some 37 million, as well as a large Afghan diaspora around the world. *Radio* and *TV Ashna* cover a wide variety of issues including current affairs, U.S. policies, security, health, science, entertainment, sports, youth and women’s rights. In addition, VOA reaches about 80 percent of Afghanistan’s web and social media users, including more than 8 million followers on its Dari and Pashto Facebook pages. Afghanistan’s post-Taliban constitution guarantees freedom of press, but insurgent and terrorist groups, the government, powerful warlords and clerics continue to control and influence major news sources. *Radio* and *TV Ashna* and the service’s digital platforms fill the information gap by providing daily local and international news.
