

VOA Broadcasting in Russian

Denied direct distribution and program placement on Russia's media outlets, VOA Russian employs a digital-first strategy that is complemented by increased programming on television, the dominant media platform among Russian speakers, to inform, engage and connect the information-deprived Russian audiences across desktop, mobile and social platforms. The multimedia content of the service's 24/7 Russian-language television and digital news network includes video streaming, social media native products, expert blogs and user-generated content and feedback that gives alternative viewpoints on important events in the United States and the target area not presented by Russian-controlled TV.
